

# ROAD REPORT

The Official Newsletter of the Sandusky County Engineer

No. 15

September 4, 2015

## FROM THE DEPUTY ENGINEER

Since our last road report M & B Asphalt completed the paving and widening of Brush Street, now our crews are cleaning up the berm and moving mailboxes. Pavement markings and RPM's will be installed in the near future. M & B Asphalt is coming back next week to start working on the rest of the roads left on the contract. They plan to start milling Tucker Road and continue on to Oakwood, Tiffin, and Morrison.

Willis and Sons completed the installation of a storm sewer on Tucker Road. The project was seeded and strawed this week. There still are some miscellaneous areas they need to clean up, but all in all this should be a very nice improvement for the residents of Tucker Road.

KF Ventures has completed the excavation of the Hoeflich Ditch, they still have cleanup work to do and leveling the spoils where needed. They plan to come back in the fall when the crops are harvested. The next petition ditch project is the Joint County Alley Ditch. We are opening bids for the construction of this ditch next Thursday, September 10<sup>th</sup>.

We are also opening bids for our annual Pavement Markings Contract next Thursday. We have several Townships and the Village of Woodville participating in this contract. The Townships participating this year are: Rice, Scott, Woodville and York Townships.

Have a great Labor Day Weekend!!!

## FROM THE ROAD SUPERINTENDENT

For the most part our major projects for the year have been completed. The 223 box culvert was cleaned up and the channel straightened and rock placed on the banks. Dirt spoils left for the ditch clean out will still need to be hauled to CR 177 to dress up shoulders once Gerken Paving is done with the widening on CR 177. Gerken Paving is scheduled to start CR 177 on September, 14<sup>th</sup>.

The excavator and dozer were hauled to the CR 66 Bridge last week to finish the clean up there. Some channel work and grading with the dozer on all four corners shaped this area up.

### ROAD MAINTENANCE

- Road side mowing on the east side of the county continues.
- Our fair display was set up for this year's fair.
- Concrete repairs are being finished up today on Miles Newton Bridge, these areas will still have to be sealed and painted.
- Mailboxes were adjusted on Brush St.
- Dirt berm was placed along Brush St. after paving.
- The Boom Mower started this week on back banks.
- Just a reminder that our annual vehicle inspection is September 14<sup>th</sup>, so be sure to write up any repairs needed.

Hope everyone has a great long weekend.
