FROM THE ENGINEER

The hottest topic around here lately is the proposed \$5 permissive tax. The Commissioners reconsidered this idea and have decided to hold public hearings here, in our Ready Room, on June 21st and 28th. After the hearings, they will be voting on it. We are in the process of making a Power Point to present at the hearings. If it passes, it will generate around \$300,000 for our Department.

Progress continues on the NEXUS Pipeline. The east end of the County is essentially done with just final grading remaining. Most of the pipe is in the ground in the rest of the County and connections are being made to the road crossings. This past week, they completely dammed off Green Creek, just north of CR 239, to make an open cut to install the pipe. I wouldn't have guessed it was possible, but they maintained flow with large pumps.

FROM THE ROAD SUPERINTENDENT

East State Street Catch Basin Replacement and Repairs are close to finishing up; three more to replace and one to repair. We will have to go back and pave around the ones that were replaced. This has been a long process, but it will be time well spent.

Mowing continues on the east side of the county, but will be finishing up and moving back over to the west next week. The Boom Mower will also be going out next week to help with the back banks.

Miscellaneous Road Work

- Two bridges on Napoleon RD were waterproofed.
- Spot Paved a culvert on CR 198.
- Mark has started cleaning a section of the Wetjin Ditch for Ditch Maintenance.
- Mowed the Town Route.
- Started washing down our truss bridges.
- Cutting the rumble strips back in on Napoleon RD, both sides of SR 53.
